

Alejandro Ortiz Pérez

Software Development and Management Engineer • Full-Stack Developer

+52 271 315 7459 • aleor25.vercel.app • alex03ortizperez@gmail.com • <https://github.com/aleor25>

Professional Profile

Full-Stack Developer capable of translating requirements into scalable solutions, prioritizing performance, user experience, and maintainability. Interested in developing technological solutions for industrial environments and critical systems. Experienced in modern stacks and enterprise ecosystems.

Technical Skills

- **Backend:** Java (Spring Boot, MVC), FastAPI, Node.js, ZK Framework, JWT, Bcrypt, RBAC, REST APIs, SOAP.
 - **Frontend:** React, Next.js, Angular, Tailwind CSS, CSS3, Figma, HTML5, JavaScript.
 - **Databases:** SQL Server (T-SQL, Transactions), PostgreSQL, MySQL, MongoDB.
 - **Tools and OS:** Git, Postman, Docker, Linux (VMs, Ubuntu), VS Code, Eclipse, Android Studio.
-

Professional Experience

Frontend Developer / Technical Analyst — Azkali (Banco Azteca Hackathon)

Mexico City · Apr 2026

- Mobile layout (React Native/Expo) and component development to consume and render structured API responses (JSON) in real-time.
- Creation of wireframes and conversational flows applying positive cognitive friction for a virtual assistant.
- Direct debugging on physical devices (Expo Go) to validate the "Happy Path," ensuring a fluid and stable demonstration.

Java Developer / Systems Analyst — TASF

Puebla, Mexico · Jan 2026 – Mar 2026

- Modernization of legacy financial systems using Java, MVC pattern with Apache Struts, and interface rendering with ZK Framework.
- Consumption of Web Services and construction of controllers to orchestrate complex business rules.
- Multi-layer error tracing and debugging, implementing catalog synchronization and transactional integrity in a relational database.
- Automation of integration and functional tests using Katalon Studio, implementing a Data-Driven Testing (DDT) approach to validate business logic in ZK.

Full-Stack Developer — REDOC — UTCV

Puebla, Mexico · Jan 2026 – Mar 2026

- Architecture and implementation of a document management system with advanced hybrid interfaces (*Dual View* and *Modals*) using Next.js 14 and Tailwind CSS.
- Development of secure backend with FastAPI, implementing robust authentication schemes from scratch to prevent vulnerabilities in key endpoints.
- Design and optimization of relational database in SQL Server using T-SQL scripts, ensuring referential integrity with secure transactions.

Back-End Developer / Software Architect — DabetAI

Cuicláhuac, Veracruz · Sep 2024 – Dec 2025

- Design of client-server architecture integrating FastAPI (Python) and React Native.
- Development of microservices and integral REST API for authentication, patient management, and visualization of medical trends.
- Integration of Machine Learning models for the prediction of retinopatía diabética, achieving 85% accuracy in the testing phase.

Full-Stack Developer / Analyst — E-commerce

Cuitláhuac, Veracruz · May 2025 – Aug 2025

- Integral development of e-commerce platform from scratch, including UI/UX prototyping in Figma.
- Implementation of interactive, responsive frontend and asynchronous state validations in React.

Developer and Analyst — IAPEx — UTCV

Cuitláhuac, Veracruz · Feb 2024 – Mar 2025

- Institutional web solution architecture using Angular, Node.js, and PostgreSQL.
 - Gathering, analysis, and documentation of functional and non-functional requirements, including unit and integration testing.
-

Education

Universidad Tecnológica del Centro de Veracruz · April 2026

Software Development and Management Engineering.

Universidad Tecnológica del Centro de Veracruz · August 2024

Associate Degree (TSU) in Multiplatform Software Development.
